## Clinical Details

LMP ..... EDD .....

- >10+3 week scan and NIPT with pre/post test result genetic counselling
- 12 week scan with CFTS +/- NIPT with pre/post result genetic counselling
  - With preeclampsia (PE) screening\*
- NIPT with pre/post test result genetic counselling for high risk NT scan
- NIPT with pre/post test result genetic counselling for scan finding or for further reassurance

Clinical Notes: .....

## Notes

- NIPT is a blood test available after 10 weeks.
- NIPT is an excellent screening test for chromosomal conditions - it is not diagnostic.
- SO+GI Scan recommends a scan prior to NIPT to confirm viability/dates/number of fetuses.
- NIPT doesn't replace the NT scan, which screens for open spina bifida and can identify some major structural anomalies.
- If NIPT has been resulted combined first trimester screen (CFTS) risk is not calculated.
- Invasive testing (CVS/amniocentesis) is offered and discussed if:
  - NT > 3.5mm
  - A fetal structural anomaly has been identified
- Medicare rebates are not available for the NIPT blood test, rebates are available for associated scans.

*\*PE screening can include FTSS and PIGF drawn after 11 weeks and before NT scan to improve accuracy.*

For further information please contact us on 07 3120 4200 or [sogi@i-med.com.au](mailto:sogi@i-med.com.au)

MBBS FRANZCR  
Diploma Fetal Medicine  
(London)

## + Obstetrics

- Early dating pregnancy assessment (<10 weeks)
- NIPT with genetic counselling
- Nuchal translucency scan +/- combined first trimester screen (12+3 - 13+5 weeks)
- First trimester pre-eclampsia screening (with NT scan)
- Morphology scans (20 weeks)
- Third trimester growth scans
- Chorionic villus sampling (CVS) & amniocentesis
- Pregnancy calculator

## + MRI

- Fetal MRI
- Pelvic MRI

## + Gynaecology

- Gynaecological ultrasound
- Endometriosis assessment
- Saline infusion sonography (SIS) and tubal patency assessment (HyCoSy)
- Abnormal uterine bleeding and post menopause health assessment

## + Genetic counselling

- Consultation to assess genetic risk based on family history or carrier screening results
- Discuss the results of tests or screening done during pregnancy
- Discuss prenatal diagnostic testing
